Commissioner for Patents

The examiner acknowledges applicant's remarks wherein Applicants provide a correlation between portions of the book entitled Netcentric and Client/Server Computing and the portions of Applicants' specification, however, applicants fail to specifically point out or map specific portions that corresponds to specific limitations of the pending claims 1-41 in the applicants' submitted book. In 37 CFR 1.131(b) "The showing of facts shall be such, in character and weight, as to establish reduction to practice prior to the effective date of the reference, or conception of the invention prior to the reduction to practice or to the filing of the application. Original exhibits of drawings or records, or photocopies thereof, must accompany and form of the affidavit or declaration or their absence satisfactorily explained. (See M.E.P.. 715). For example in the independent, Claim 1 recites "a plurality of database servers" corresponds to which specific part of the Applicant's Book? "A plurality of data stores each in communication with one of the database servers, wherein the database servers are operable to access the data stores" corresponds to which specific part of the Applicant's Book?. If the Applicants believe that the invention as claimed is described in the Applicants' book as indicated in the remark pages 2-4, an indication as to where the cited claims language are taught in the portion of the Applicants' book would not be so difficult to show. Therefore, Applicants are hereby required specifically pointing out or mapping each claim limitation into his/her submitted book.

Jean M. Cornelius
Primary Examiner
